

Memorandum of Agreement (MOA)

The purpose of this Memorandum of Agreement ("MOA") is to establish frequency coordination protocols that both support applicants seeking mobile only systems in the VHF and UHF bands and concurrently promote the licensing of exclusive use channels that support the deployment of trunked radio systems. As such, the six FCC-certified Industrial/Business (I/B) frequency advisory committees (FACs) unanimously agree to abide with the following protocols while coordinating mobile-only applications:

- All mobile-only applications for non-itinerant channels that seek an area of operation not defined by a specific mile radius of a set of geographic coordinates ("Wide-Area"), shall include an attachment from the I/B FAC requesting a secondary, non-interference condition vis-a-vis current and future licensees;
- The I/B FAC's frequency coordination certification shall include an attachment stating that no current exclusive use (channel designation FB8) operations are licensed in the proposed area; and
- The I/B FACs shall inform all new applicants seeking FB8-designated channels of any authorized secondary, mobile-only Wide-Area licensees in the applicant's proposed operating area.

This MOA is entered into by and among the undersigned FACs as of the latest date provided below.
